Dear Campus,

Due to some unforeseen circumstances, we are going to be upgrading our Haskell email system tomorrow on September 9, 2020 at 10:00 AM CDT. Once this switchover is complete you will need to follow the instructions on the the attached documentation to gain access back into your emails. We suggest you print these instructions our or just download to your device for access later.

We understand that this is not the best time to implement something new but it was something that has to be done and we had no choice but to upgrade.

Your password will NOT change, it will remain the same and your email address will be the same it will NOT change either. All of your existing emails will be intact!

Also, moving forward each student will receive 5 downloadable copies of Office 2019 to install on any device they want to for free. You can install on your laptops, tablets or even phones all at once. We hope you enjoy this particular new service as you continue your education journey at Haskell.

If you have any problems or questions please call our help-desk line at [\(785\) 820-2712](tel:(785)820-2712)

Haskell I.T. Department
